

SAN ANTONIO ENVIROSNACK

SUBJECTS: Social Studies

PROCEDURE

(Social Studies TEKS K.5A, K.16B, 1.6A, 2.7B)

1. Assemble the envirosnack by spreading frosting on a full size graham cracker.
2. Add hills as desired.
3. Sprinkle with green grassland sugar crystals.
4. Place the evergreen nonpareils to create a forest area.
5. Add blue icing to form hill country waterfalls, rivers, and lakes. (Make sure to use cake icing and not gel). The instructor may want to control application of the blue icing as it is the most expensive ingredient. (Another choice would be to use blue sugar sprinkles in place of the blue icing.)
6. Add clouds according to personal preferences-perhaps surrounding the hills, creating precipitation that ends up as a lovely hill country stream. (Whipped topping could be used instead of marshmallows, but would require refrigeration.)

MATERIALS:

- *Chocolate graham crackers...soil
- *White spreadable cake frosting...adhesive agent
- *Chocolate kisses (2 or 3 per student)...Hill country
- *Green sprinkles...grassland
- *Green tree nonpareils (evergreen shape)...forests
- *Tube of blue cake icing (no gel)...lakes and streams
- *Small marshmallows or cool whip...clouds/precipitation

NOW (EAT YOUR ENVIROSNACK AND ENJOY!)
